

Eclipse

Feminized CBD

- CBD: 13% – 19%
- THC: less than .1% total
- Profile: Fresh and sweet profile

Sex Test Results:	99.99% Female
Germination Test Results:	94% Germ Rate

Our Eclipse CBD strain is the product of 9 generations of in-house selective breeding. This strain is ideal for large flower and biomass output. It has been strategically bred to promote few leaves and many flowers. We recommend 2,800 to 3,200 seeds per acre.

Eclipse is the best CBD strain we have created. Large plants with high CBD and low to no detectable THC have made this strain popular for both large and small farms. It's excellent to grow in all climates, and has been bred to be resistant to mold and mildew.

Feminization Results

Date received: 11/18/2019

Date reported: 12/05/2019

Received as: Eclipse
Quantity received: 100 seed(s)
Lot(s): None

Assay ID	Target	Quantity Tested	Completed
14019	Variety identification	100 seed(s)	12/05/2019

Method: DNA marker

Results: 100 Female, 0 Male, 0 No Amplification. Analysis based on 1 marker.
