

# La Crema

## Feminized CBG

- CBG: 16% – 20%
- THC: less than .17% total
- Profile: Fresh and strong profile

Sex Test Results:	94% Female
Germination Test Results:	94% Germ Rate

La Crème is a pleasant and energizing variety of sativa-dominant hemp, weighing in at over 20% total cannabinoids. The terpene profile is modest and smells of fresh floral arrangements. We recommend 2,600 to 3,000 seeds per acre.

La Crème is the culmination of our years tinkering with hemp seed genetics. This superior strain produces large plants with a high CBG percentage anywhere from 16% – 20%.
